Optimizing External Partner Order Processes

Here's a summary of your recent work session, Joe:

### **Summary**

You were engaged in a detailed work session focused on setting up and troubleshooting product and store data within the Foundry system and NetSuite, particularly for Rally House orders and EDI processes. The conversation involved step-by-step guidance and collaborative problem-solving to ensure smooth data flow and order processing.

### **Atmosphere**

The atmosphere was highly collaborative and instructional, with a clear focus on problem-solving and refining operational workflows. There was a sense of methodical progress as you worked through technical details. In the background, there were snippets of political commentary and a business webinar, adding a layer of ambient information to your work environment.

### **Key Takeaways**

- You worked on replicating data rows and understanding the specific requirements for Rally House, including their unique SKU and pricing structures.
- You gained further experience in setting up new stores and products within the Foundry system, focusing on EDI numbers and UPIs (Unique Product Identifiers).
- You actively participated in troubleshooting issues related to user access and ensuring data consistency between systems like Foundry and NetSuite.
- You discussed the importance of accurate data entry and the impact of incorrect information on order processing, particularly for dropship orders.
- You identified a specific task to check on an un-updated logo for Orland Park, highlighting your attention to detail in product presentation.

### **Work on Rally House & EDI Processes**

A significant portion of the discussion revolved around managing data for Rally House. You worked on understanding how to replicate data for new product setups and the specific information Rally House requires, such as unique SKUs and pricing. You delved into the details of EDI (Electronic Data Interchange) numbers and UPIs, distinguishing

between different types (IN and RH UPI) and ensuring correct prefixes. The goal was to streamline the process so that orders would come through automatically, avoiding manual intervention. You also explored how Rally House dropship orders integrate with NetSuite, ensuring accurate data transfer.

## **Foundry System Management**

You actively used the Foundry system, learning and applying steps for setting up new stores and managing customer approvals. This included navigating the system, refreshing screens, and understanding how to check the "design customer approval" status to optimize the workflow. You also worked on troubleshooting user access issues within Foundry, specifically for a colleague named Mary, who was encountering "no authorized products" messages. The session involved adding partners and locations, and confirming that changes were saved correctly within the system.

## **Team Collaboration & Troubleshooting**

The session was a collaborative effort, with a colleague providing guidance and walking you through various steps in Foundry and NetSuite. You asked pertinent questions to clarify processes and ensure accuracy, demonstrating your commitment to understanding the intricacies of the system. There was a brief mention of a meeting held the previous day, indicating ongoing team discussions about these operational processes. A lighthearted comment about "giving Joe everything we don't want" highlighted the team's dynamic and shared workload. You also took the initiative to check on a specific website update for Orland Park's logo, showing your proactive approach to maintaining current product information.

## **Personal Context**

While deeply engaged in your work, your day also included personal plans, such as driving home, stopping at the grocery store, preparing for dinner, and refilling your Roomba's water. These small moments underscore the balance of your busy professional and personal life.

## **Action Items**

- **Follow-up on Orland Park Logo:** Check the Orland Park Pioneers' football helmet logo to ensure it has been updated on the website, as it appeared to be the only one missed.

- **Review Foundry Access for Mary:** Investigate why Mary is seeing "no authorized products" and resolve her access issues in Foundry.
- **Reinforce EDI/UPI Processes:** Continue to practice and internalize the steps for setting up EDI numbers and UPIs for Rally House in Foundry to ensure smooth, automated order processing.

**7/17/2025 12:40 PM to 7/17/2025 1:15 PM**

Barnes Noble product pricing details

## **Summary**

You had a discussion about Barnes & Noble pricing, specifically for the button keychain with a bottle opener, and learned about the company's plans to phase out that product.

## **Atmosphere**

The conversation was professional and focused on clarifying product details and inventory status for work.

## **Key Takeaways**

- You reviewed the Barnes & Noble 2025 pricing document.
- You inquired about the cost of the button keychain with a bottle opener for Barnes & Noble.
- A colleague confirmed that these keychains are being phased out, and there might be efforts to clear existing stock.
- You also touched upon specific product details like "Shock detail" and "XL color shock details," likely related to product configurations or data fields.

## 7/17/2025 10:51 AM to 7/17/2025 12:40 PM

Obtaining sales and inventory reports

Here's a summary of your recent work conversation, Joe:

### Summary

Today's discussion centered on critical data analysis and reporting for your company, focusing on sales, inventory, and shipping metrics. You collaborated with colleagues to troubleshoot issues and strategize on how to best present key business insights.

### Atmosphere

The atmosphere was highly professional, collaborative, and focused on problem-solving, with a clear emphasis on data-driven decision-making.

### Key Takeaways

- **Detailed Reporting Needs:** There's a clear need for comprehensive reports on best-selling items, missing inventory, and sales performance per store, particularly for clients like Rally House.
- **Data Comparison:** The goal is to compare internal system data with actual store inventory to identify sales opportunities and gaps.
- **Shipping and Sales Metrics:** You'll be providing monthly reports on orders shipped and total dollar amounts shipped since January 2024.
- **Operational Troubleshooting:** You addressed issues related to barcode discrepancies and file naming conventions affecting product data.
- **Team Coordination:** Effective communication and collaboration with various colleagues are essential for gathering data and resolving operational challenges.

### Data Analysis and Reporting

The core of the conversation revolved around generating insightful reports. You discussed the need to identify best-selling products and pinpoint missing inventory items on a per-store basis, likely in the context of your work with Rally House, as indicated by your calendar. The aim is to compare what's recorded in your internal systems, including NetSuite, with the actual inventory at the stores to uncover growth opportunities. You were tasked with providing monthly reports detailing the number of orders shipped and the total dollar amounts shipped, starting from January 2024. There was also a specific

request to obtain a full list of 700 stores for a report that had previously only captured 100.

## **Operational and Technical Details**

You delved into practical operational challenges, such as a store ordering an item with a different barcode, necessitating a change in the file name for printing. The discussion also touched upon the importance of specific file formats like JPEG for ensuring color consistency and Illustrator/AI files for maintaining vector artwork quality. You also mentioned using the "whisper app" as a tool to streamline your work by copying previous efforts.

## **Team Collaboration**

Throughout the discussion, you actively collaborated with several colleagues. You mentioned connecting with "PCI" (likely an internal group or system) and discussed following up on an email from Gracie by forwarding it to Stephanie for further assistance. Oscar and Megan were also mentioned in the context of information exchange, and Cindy was noted for her role in payroll data. The team also relies on Folak for Excel files containing approved items and part numbers.

## **Background Interruption**

At one point, there was a brief, out-of-context political comment ("You're a leftist joke") that appeared to be background noise from an external source, completely unrelated to your work discussion.

## **Action Items**

- Generate and provide the monthly reports on orders shipped and total dollar amounts shipped since January 2024.
- Obtain the full list of 700 stores for the inventory report that previously cut off at 100.
- Follow up on Gracie's email by forwarding it to Stephanie to get the necessary information.
- Continue addressing the barcode and file naming convention issues for accurate product data.

## 7/17/2025 10:14 AM to 7/17/2025 10:50 AM

Clarifying royalty report data tasks

### Summary

You had a focused work conversation with colleagues about processing reports, managing image downloads for Rally House, and handling data, all while navigating office logistics.

### Atmosphere

The atmosphere was collaborative and task-oriented, with a clear focus on resolving work-related inquiries and ensuring data accuracy.

### Key Takeaways

- You reviewed a report, possibly a royalty report for bookstores, and questioned if it was sent to the correct recipient, offering to follow up on it with Bailey.
- You were working on downloading images into a folder, which aligns with your ongoing task of fixing missing images for Rally House.
- You performed data manipulation by copying and pasting a column as a value to preserve links without formulas.
- You discussed office operations, noting that production was working overtime and the office is typically closed on Fridays.

### Action Items

- Follow up regarding the bookstore royalty report to confirm if it was sent to the correct person (Bailey).

**7/17/2025 8:05 AM to 7/17/2025 10:13 AM**

Custom GPT Pricing Data Issues

## Summary

This conversation centered on work processes, particularly pricing data and the use of AI tools, interspersed with personal anecdotes and team discussions about efficiency.

## Atmosphere

The atmosphere was collaborative and productive, with a mix of focused problem-solving around pricing and AI, and lighthearted personal sharing among colleagues.

## Key Takeaways

- Discussed using AI for pricing, specifically for ColorShack decals and other products, and troubleshooting issues with its information retrieval.
- Identified discrepancies in pre-pricing for orders like Georgia Keytech, highlighting a need for clarification on pricing updates and consistency.
- Explored the functionality and limitations of your custom GPT, particularly regarding its ability to learn and share information.
- Considered using Dropbox for storing pricing data due to its AI search capabilities.
- Addressed a need for a new computer setup for a colleague to assist with order processing.

## Work Discussions & Pricing

The team engaged in a detailed discussion about pricing and data management, particularly concerning ColorShack products and specific orders like the Georgia Keytech order. You clarified the structure of the pricing sheet, explaining the style code, product type, minimum quantity, and preprint price columns. A key point of discussion was a discrepancy where a product was pre-priced at \$4.98 but typically sold for \$7.98, prompting a need to determine whether to update the price or honor the original. A colleague mentioned that Party City is no longer a business and owes money, which might explain issues with their API. There was also a focus on ensuring that pricing updates are added rather than replacing existing descriptions to prevent data loss. The

team considered setting up a dedicated computer for a colleague to handle order processing more efficiently.

## AI & GPT Implementation

A significant portion of the conversation revolved around your custom GPT for pricing. You expressed interest in having the GPT learn facts about you and offer verification options, similar to how an app might locally save information. You also sought to understand why your custom GPT wasn't providing information when asked about Party City pricing, despite having uploaded relevant data to your CDI Corp knowledge base. A colleague acknowledged your work in setting up AI for pricing, and the team discussed how to effectively share access to this tool and its data, with Dropbox being suggested as a good spot due to its new AI search capabilities.

## Team Dynamics & Personal Moments

The conversation included a mix of professional and personal exchanges. You playfully commented on a colleague's "lady in red" outfit. A colleague shared several amusing personal anecdotes, including a story about getting a rash from sun exposure and a frustrating experience at a restaurant where expensive guacamole and Diet Cokes led to a vow never to return. There was also a brief mention of a banquet hold and the importance of showing up for events.

## Action Items

- Investigate why your custom GPT is not providing information when queried about Party City pricing, despite data being uploaded to the CDI Corp knowledge base.
- Clarify the process for updating pricing sheets to ensure new descriptions are added and not lost, and determine if the \$7.98 pre-price for Georgia Keytech orders should be honored.
- Explore setting up a dedicated computer for Megan to assist with order processing.
- Consider using Dropbox for storing pricing data due to its new AI search capabilities.

# 7/17/2025 7:09 AM to 7/17/2025 8:04 AM

System Problems, Task List Ideas

## Summary

Today's conversation focused on navigating work tasks, particularly processing orders for UPI and Rally House, while troubleshooting persistent computer and iPad issues that are hindering workflow. There was also a notable discussion about integrating "suggested tasks" into your personal task management system.

## Atmosphere

The atmosphere was collaborative and problem-solving oriented, as you and your colleagues worked through immediate operational challenges and discussed potential improvements for task management. There was a clear focus on efficiency and resolving technical glitches.

## Key Takeaways

- **Order Processing:** You discussed saving and processing a "UPI one" order and planning to handle Rally House orders later in the morning, which your colleague confirmed are "trap ships."
- **Technical Roadblocks:** A significant portion of the conversation revolved around computer issues, specifically images not loading on order pages and iPads frequently requiring restarts to upload pictures or submit information. This seems to be a recurring "sweatshop" issue.
- **LIDS Address Inquiry:** You were awaiting information regarding a generic LIDS address and whether you had access to modify it.
- **Task Management Enhancement:** You explored the idea of creating a dedicated tab or feature to display "suggested tasks" and seamlessly add them to your task list, aligning with your ongoing interest in optimizing your workflow and GTD methodology.

## Action Items

- **Follow Up on Orders:** Ensure the "UPI one" order is saved and processed, and proceed with the Rally House orders as planned.
- **Address Computer/iPad Issues:** Continue to troubleshoot and find a more permanent solution for the image loading problems on the computer and the frequent iPad restarts needed for uploads and submissions.
- **Investigate LIDS Address:** Follow up on the LIDS address inquiry to understand access and modification possibilities.
- **Explore Task Integration:** Look into developing or implementing a feature that displays "suggested tasks" and allows for their easy addition to your main task list, enhancing your personal productivity system.

## 7/17/2025 5:53 AM to 7/17/2025 7:09 AM

Managing a Show's Eclectic Content

Here's a summary of your recent moments:

### Summary

While driving to work, you were listening to a political podcast discussing various topics including the "deep state," figures like Brennan and Comey, and the Jeffrey Epstein case. Alongside this, you engaged in a conversation about bold dating approaches, specifically a story involving someone named Elizabeth and the "salad stealing" trend, while also making a few personal observations.

### Atmosphere

The atmosphere was a mix of serious, politically charged commentary from the background podcast and a more lighthearted, inquisitive discussion about modern dating and social trends. Your brief interjections added a touch of personal reflection and practical check-ins to the environment.

### Key Takeaways

- You were driving to work, as indicated by your calendar and the Apple CarPlay screen showing your route in Chicago, listening to a Glenn Beck podcast titled "The ONLY Trump/Ep..." with the artwork labeled "Grand Conspiracy?".
- The podcast covered topics such as the FBI's grand conspiracy probe, the Russia hoax, Hunter's laptop, and the roles of figures like James Comey and John Brennan, along with advertisements for various products and services.
- You engaged in an active conversation about "the most bold way to hit on somebody," discussing a story involving a person named Elizabeth who was approached in a unique way in Amsterdam. You probed further into the details, including the person's attractiveness and Elizabeth's current dating status.
- The conversation also touched upon the "salad stealing" dating trend, where individuals take someone's salad, look them up on LinkedIn, and then try to initiate contact, which you found to be a "genius" but also somewhat desperate approach.
- You made a few brief personal comments, such as reminding someone to add glutathione to the fridge and noting that a shirt and hat were not yours.
- You checked on the status of something, asking "Is everything working for now?"

## Action Items

**No specific action items for you were identified during this conversation.**

**7/17/2025 1:59 AM to 7/17/2025 2:45 AM**

Challenging Government Overreach, Protecting Freedoms

Here's a summary of your recent listening experience, Joe:

### Summary

You listened to a broadcast, likely a political hearing or discussion, that delved into various aspects of government policy, civil liberties, and national security. The conversation primarily featured a Senator questioning a nominee or witness on topics ranging from government overreach and free speech to immigration policies and Homeland Security operations.

### Atmosphere

The atmosphere of the broadcast was formal, serious, and highly political, characterized by structured questioning and detailed discussions on policy and constitutional matters.

### Key Takeaways

- **Government and Free Speech:** The discussion touched on concerns about government influence and potential overreach regarding free speech, including references to Mark Zuckerberg's testimony and YouTube's censorship policies. The importance of the First Amendment and its misinterpretations were also highlighted.
- **Homeland Security and Immigration:** There was significant focus on immigration policy, specifically the use of the CBP One app for processing aliens, the concept of "catch and release," and the abuse of parole authority. The need for accurate data and resources to address real threats in homeland security was emphasized.
- **Anti-Semitic Violence and Terrorism:** The broadcast addressed the rising threat of anti-Semitic violence and the broader issue of protecting Americans against terrorism, with a commitment to addressing these concerns.
- **Data and Transparency:** A recurring theme was the challenge of obtaining accurate data and information from government agencies, with an anecdote about a traveler's bag and bullets used to illustrate issues with processing and information.
