

# Listening

Welcome to the Listening app.

With this app, you can listen to academic papers, PDFs, web pages, and emails while on the go.

To get you started, we've hand picked a few audios for you to try out.

Uploading your own documents is easy. You can do it from your desktop or your phone.

To upload from desktop, download the Listening desktop app, or log into the Listening website.

To upload from your phone, just click "Upload" in the Listening app and select a file. You can also click "Share" from directly inside your phone's browser, such as Chrome or Safari. Once a file is uploaded, our A.I. will convert it into high quality audio, and you can listen to it on the go. You can also view the original text as the audio is being read to you.

As you're listening, click the "plus note" button to take notes with one click. The last 2 sentences you heard will be added to your notepad automatically, without you needing to type.

We also conveniently split PDFs and papers into chapters for you, so you can choose which sections to listen to.

You can always change the voice in the Settings page.

We hope you enjoy Listening. If you ever have questions or feedback, just email us at support at listening dot com.
